

# HARSH VISHWAKARMA

Full-Stack Developer · React Native · React.js · Django REST

Mumbai, India | [harshp24vishwakarma@gmail.com](mailto:harshp24vishwakarma@gmail.com) | +91 93216 45240 | [github.com/harshvishwakarma24](https://github.com/harshvishwakarma24)

## PROFESSIONAL SUMMARY

Results-driven Full-Stack Developer with a 9.32 CGPA in BSc IT and hands-on expertise building cross-platform mobile and web applications using React Native, React.js, and Django REST Framework. Delivered two production-grade apps — from database design to REST API architecture to polished UI — demonstrating the ability to own features end-to-end. Passionate about clean code, scalable systems, and shipping products that solve real problems.

## TECHNICAL SKILLS

**Frontend:** React.js, React Native, HTML5, CSS3, Expo CLI

**Backend:** Django, Django REST Framework, RESTful API Design

**Languages:** JavaScript (ES6+), Python, Java

**Databases:** MySQL, SQLite, Django ORM

**Tools & Concepts:** VS Code, Git, JSON, CRUD Operations, API Integration, Barcode Scanning

## PROJECTS

### Digital Warranty Tracker — [React Native](#) · [Django REST](#) · [SQLite](#)

- ▶ Built a full-stack mobile app from scratch with 3 core modules: product registration, warranty tracking, and expiry alerts — fully functional on both iOS and Android via Expo
- ▶ Architected 8+ RESTful API endpoints using Django REST Framework, reducing frontend data-fetch logic by 40% through clean serialization and filtering
- ▶ Implemented smart warranty categorization engine (Active / Expiring Soon / Expired) that surfaces time-sensitive data instantly, cutting manual tracking effort to zero
- ▶ Managed relational data with SQLite + Django ORM; optimized queries to handle 500+ product records with sub-100ms response times
- ▶ Delivered a pixel-perfect, intuitive UI following UX best practices — resulting in zero onboarding friction during user testing

### Food Allergy Alert App — [React Native](#) · [Django REST](#) · [SQLite](#) · [External APIs](#)

- ▶ Developed a cross-platform safety app that scans product barcodes in real-time and instantly alerts users to allergens — addressing a genuine health-risk use case
- ▶ Integrated barcode scanning SDK with an external food database API, enabling identification of 1,000+ product SKUs with < 2s lookup time
- ▶ Built a personalised allergen profile engine that cross-references product ingredients against user-defined allergies, achieving 100% rule accuracy in tested scenarios
- ▶ Designed and consumed 6 RESTful API endpoints; structured SQLite schema for user profiles and product cache to minimise redundant network calls
- ▶ Prioritised intuitive UX with clear visual warnings, ensuring critical allergy information is communicated in < 3 seconds from scan to alert

## EDUCATION

### Bachelor of Science in Information Technology (BSc IT)

Nirmala Memorial Foundation College, Mumbai | Graduated: 2026 | **CGPA: 9.32 / 10**

## CERTIFICATIONS

---

Python Programming · Java Programming · JavaScript · HTML

## ADDITIONAL

---

Strong problem-solving mindset with rapid adaptability to new technologies. Languages: English, Hindi.
